

My name is Matthew Scott and I am a UI/UX Designer who is passionate about both designing and coding user friendly applications. With the mix of my design, development, and leadership skill set I believe that I would be a perfect fit for the Digital/eCommerce Design Lead position.

Over the past 5 years I have worked in the Event Services and Fashion industries as a UI/UX Designer. During this time I have worked on a variety of products such as web/mobile applications, dashboards, landing pages, and various marketing materials such as logos. While working on these products I had to use a combination of design skills like user research, wireframes/prototypes, information architecture, and other established design principles.

Creating designs was 75% of my responsibilities. The remaining 25% was implementing the designs or working with other developers to get it done. My main area of expertise is JavaScript and HTML/CSS, however I have experience in other languages such as .NET and PHP.

I would welcome the opportunity to meet you to discuss my application in more detail. Feel free to contact me at 774-526-1672 or email me at matt.taylor.scott@gmail.com. You can also view my portfolio at mattscottdesigns.github.io/portfolio. Thank you for your time and consideration.
