EXPERIENCE

- Senior UI/UX Developer

Convention Data Services

November 2019 — Present

Lead the direction of UI and UX decisions for our products. Worked on projects using JavaScript (ES6 / React / React Native), standardizing the look and feel across products while continuously improving the UI/UX. Also lead a committee that was in charge of evaluating and improving the next product on our company roadmap.
- Senior Web Graphic Designer

Brahmin Leather Works

July 2019 — November 2019

Worked with the ecommerce department to ensure all designs created follow the company branding guidelines. Used Adobe Creative Suite to create landing pages, digital catalogs, emails, and advertisements. This involved working with the photography team to provide direction of the product shoot and assist with editing.
- UI/UX Developer

Convention Data Services

July 2017 — July 2019

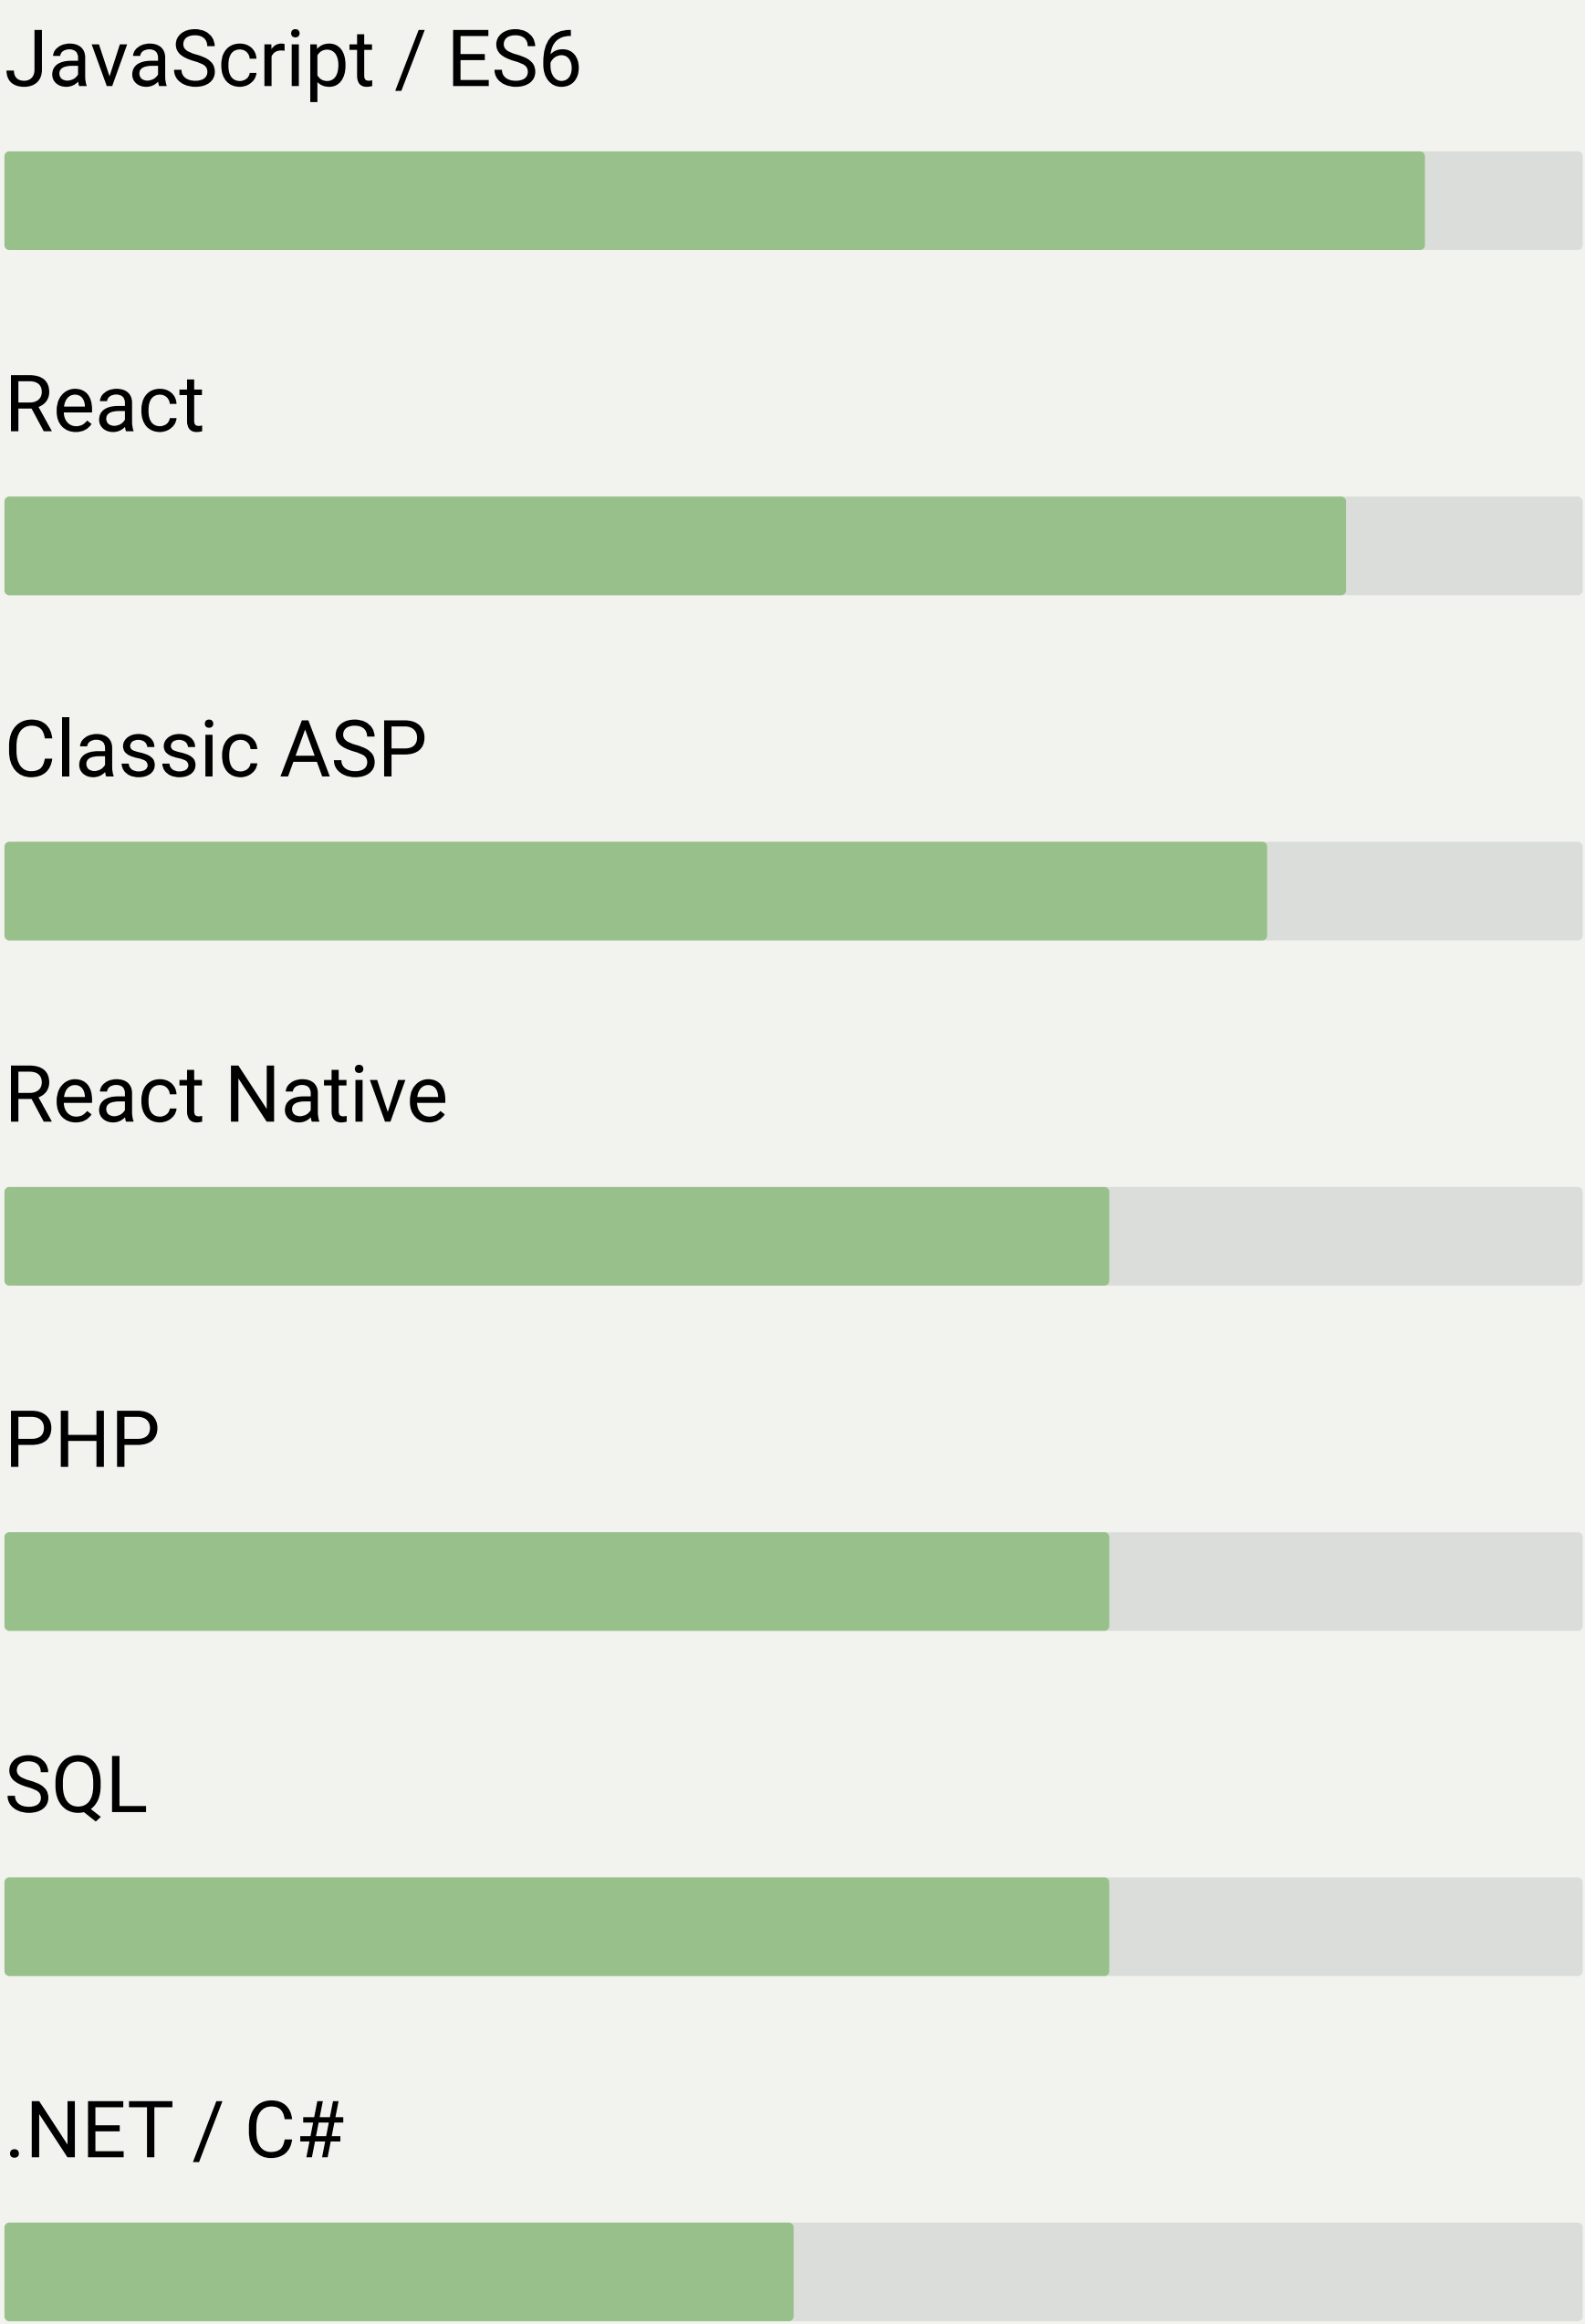

Worked with product stakeholders and users to research pain points and areas of opportunity in all of our products. Used wireframes and Adobe XD to put the designs together and HTML/CSS/JavaScript to make an interactive prototype. Also worked with the developer to ensure the vision of the design it acheived.
- Web Developer

Convention Data Services

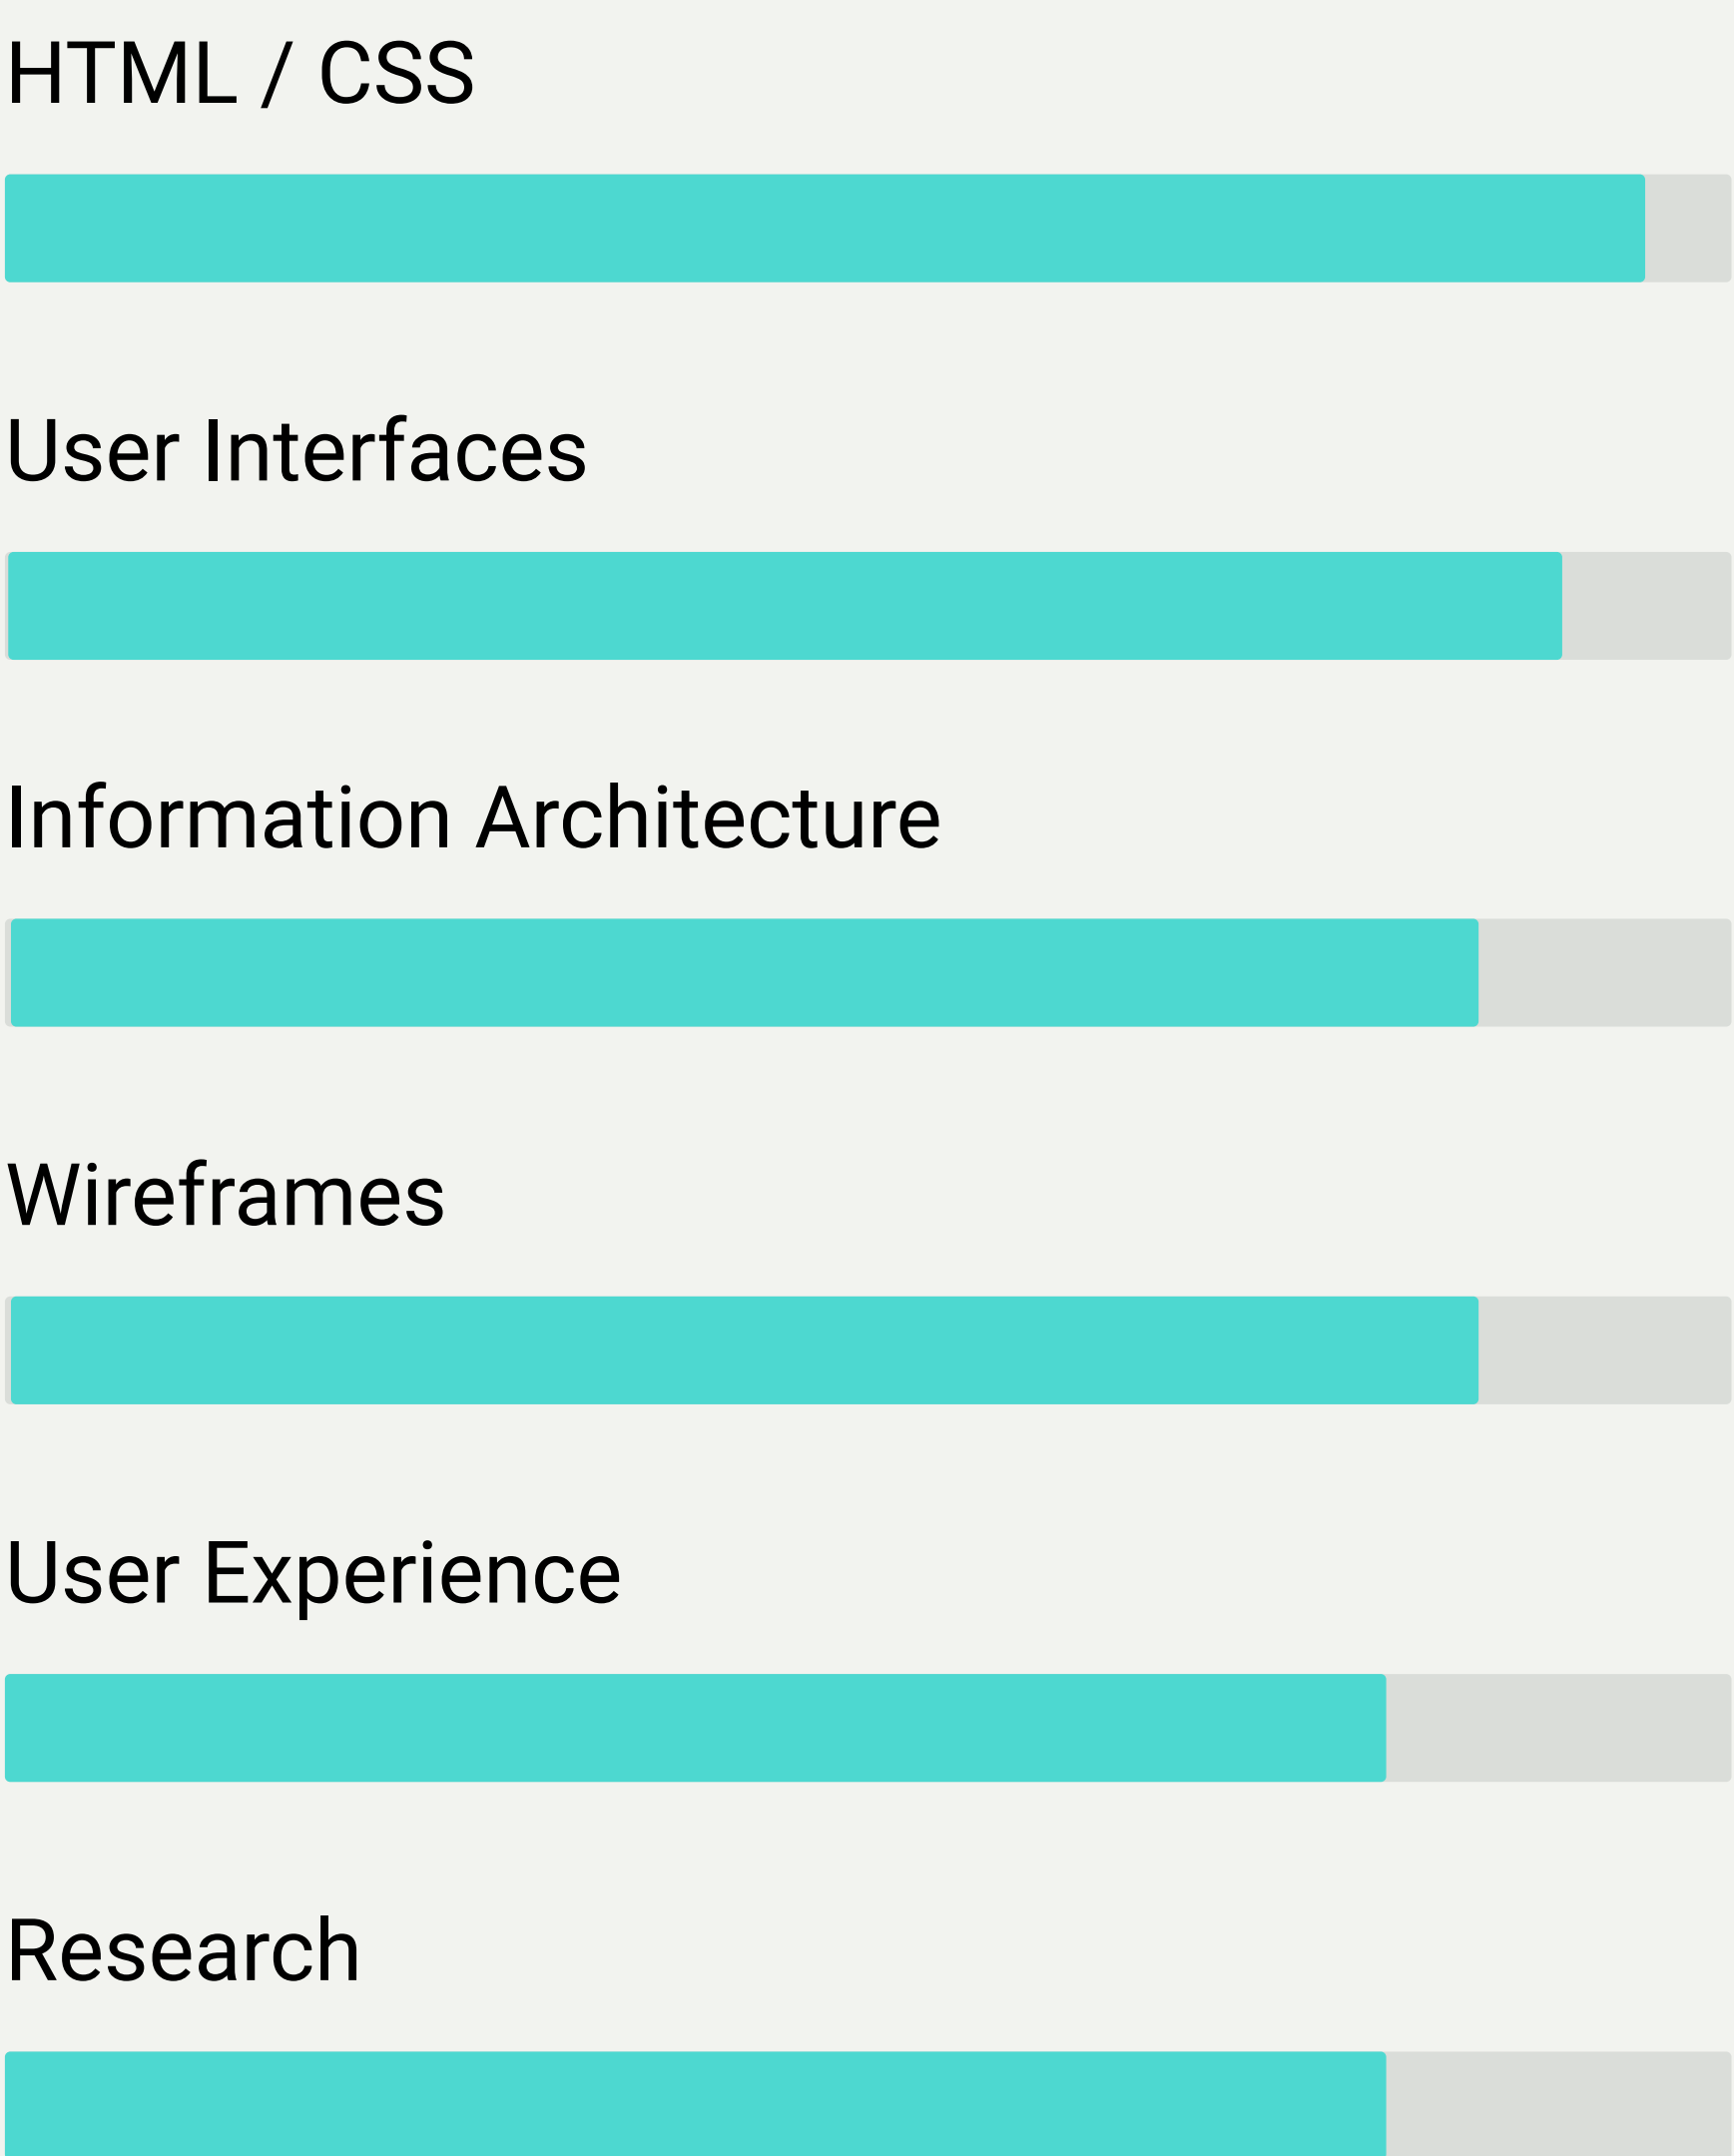

December 2015 — July 2017

Worked with clients to setup their event database and understand their business rules to create minimal and easy to use registration website for their attendees. This was accomplished using Classic ASP, JavaScript, and HTML/CSS. This also involved working with 3rd party integrations for things like member databases.
